

## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application.

### **Listing of Claims:**

1. (Currently Amended) A computer-implemented method for prepaying roaming minutes, comprising:

crediting a user's account with prepaid roaming minutes purchased by a user, the prepaid roaming minutes comprising units of time for telephone usage outside of a home calling area defined by a user's calling plan, wherein the user's calling plan includes a roaming charge for the prepaid roaming minutes and wherein the home calling area comprises one of a plurality of predefined geographical areas each of which is within a larger predefined geographical area comprising a national calling area;

receiving one of a plurality of access codes before dialing a roaming call, each of the plurality of access codes corresponding to a certain number of the prepaid roaming minutes;

notifying the user of the number of prepaid roaming minutes in the user's account via a display on a wireless telephone associated with the user;

determining whether the prepaid roaming minutes were purchased at a time greater than a predefined time before a call is made, wherein the prepaid roaming minutes are purchased at a discounted rate, wherein the discounted rate is lower than the roaming charge included in the user's calling plan, and wherein the prepaid roaming minutes are subtracted from the user's account at the discounted rate when the prepaid roaming minutes were purchased at a time greater than the predefined time and when the call is made outside the home calling area defined by the user's calling plan; and

determining whether the length of the roaming call is greater than the number of prepaid roaming minutes in the user's account, wherein the difference between the length of the roaming call and the number of prepaid roaming minutes in the user's account is charged as undiscounted roaming when the length of the roaming call is greater than the number of prepaid minutes in the user's account.

2. (Original) The method of claim 1, further comprising:  
crediting prepaid roaming minutes at a discounted rate.
3. (Previously Presented) The method of claim 1, further comprising:  
crediting prepaid roaming minutes at a discounted rate proportional to the time  
purchased.
4. (Original) The method of claim 1, further comprising:  
crediting a user's account with prepaid roaming minutes periodically.
5. (Original) The method of claim 1, further comprising:  
receiving a purchase order for roaming minutes from a user.
6. (Canceled)
7. (Original) The method of claim 1, further comprising:  
deleting the roaming minutes after a predefined time.
8. (Original) The method of claim 7, wherein the predefined time is about six  
months.
9. (Canceled)
10. (Previously Presented) The method of claim 1, wherein the predefined time is  
about one month.
11. (Original) The method of claim 1, wherein crediting further comprises:  
crediting a user's account with a block of prepaid roaming minutes.
12. (Original) The method of claim 11, wherein the block of prepaid roaming  
minutes is in increments of at least about 10 minutes.

13-14. (Canceled)

15. (Currently Amended) A computer system for prepaying roaming minutes, comprising:

a memory for storing executable program code; and  
a processor, functionally coupled to the memory, the processor being responsive to computer-executable instructions contained in the program code and operative to:

~~a computer; and~~

~~a software program loaded onto the computer configured to:~~

credit a user's account with prepaid roaming minutes purchased by a user, the prepaid roaming minutes comprising units of time for telephone usage outside of a home calling area defined by a user's calling plan, wherein the user's calling plan includes a roaming charge for the prepaid roaming minutes and wherein the home calling area comprises one of a plurality of predefined geographical areas each of which is within a larger predefined geographical area comprising a national calling area;

receive one of a plurality of access codes before dialing a roaming call, each of the plurality of access codes corresponding to a certain number of the prepaid roaming minutes;

notify the user of the number of prepaid roaming minutes in the user's account via a display on a wireless telephone associated with the user;

determine whether the prepaid roaming minutes were purchased a predefined time before a call is made, wherein the prepaid roaming minutes are purchased at a discounted rate, wherein the discounted rate is lower than the roaming charge included in the user's calling plan, and wherein the prepaid roaming minutes are subtracted from the user's account at the discounted rate when the prepaid roaming minutes were purchased at a time greater than the predefined time and when the call is made outside the home calling area defined by the user's calling plan; and

determine whether the length of the roaming call is greater than the number of prepaid roaming minutes in the user's account, wherein the difference between the length of the roaming call and the number of prepaid roaming minutes in the user's account is

charged as undiscounted roaming when the length of the roaming call is greater than the number of prepaid minutes in the user's account.

16. (Currently Amended) The computer system of claim 15, wherein the processor software program is further operative configured to credit a user's account with prepaid roaming minutes at a discounted rate.

17. (Currently Amended) The computer system of claim 15, ~~further comprising: a computer network in communication with the computer and wherein the processor is operative to configured for~~ allowing the user to access the account over a computer network.

18. (Currently Amended) The computer system of claim 15, wherein the processor software is further operative configured to protect the user account with a password.

19. (Currently Amended) The computer system of claim 17, wherein the ~~computer network is configured to allow a user to access~~ the user's account is accessed over the computer network using voice mail.

20. (Currently Amended) A telephone system for prepaying roaming minutes, comprising:

a memory for storing executable program code; and

a processor, functionally coupled to the memory, the processor being responsive to computer-executable instructions contained in the program code and operative to:

a telephone; and

a software program loaded onto the telephone configured to:

credit a user's account with prepaid roaming minutes at a discounted rate, the prepaid roaming minutes comprising units of time for telephone usage outside of a home calling area defined by a user's calling plan, wherein the user's calling plan includes a roaming charge for the prepaid roaming minutes and wherein the home calling area comprises one of a plurality of predefined geographical areas each of which is within a larger

predefined geographical area comprising a national calling area, wherein the discounted rate is lower than the roaming charge included in the user's calling plan;

receive one of a plurality of access codes before dialing a roaming call, each of the plurality of access codes corresponding to a certain number of the prepaid roaming minutes;

notify the user of the number of prepaid roaming minutes in the user's account via a display on a wireless telephone associated with the user;

determine whether the prepaid roaming minutes were purchased a predefined time before a call is made, wherein the prepaid roaming minutes are purchased at a discounted rate, wherein the discounted rate is lower than the roaming charge included in the user's calling plan, and wherein the prepaid roaming minutes are subtracted from the user's account at the discounted rate when the prepaid roaming minutes were purchased at a time greater than the predefined time and when the call is made outside the home calling area defined by the user's calling plan; and

determine whether the length of the roaming call is greater than the number of prepaid roaming minutes in the user's account, wherein the difference between the length of the roaming call and the number of prepaid roaming minutes in the user's account is charged as undiscounted roaming when the length of the roaming call is greater than the number of prepaid minutes in the user's account.

21. (Canceled)

22. (Currently Amended) The telephone system of claim 20, ~~further comprising: a computer network in communication with the telephone and wherein the processor is operative to configured for~~ allowing the user to access the account over a computer network.

23. (Currently Amended) The telephone system of claim 20, wherein the processor software is further operative configured to protect the account with a password.

24. (Currently Amended) The telephone system of claim 22, wherein the ~~computer network is configured to allow a user to access~~ the user's account is accessed over the computer network using voice mail.

25. (Currently Amended) The telephone system of claim 20 further comprising, ~~wherein the telephone is~~ a wireless telephone.

26. (Currently Amended) The system of claim 20 further comprising, ~~wherein the telephone is~~ a digital telephone.
